

IMAGE CAPTURE PRO

- The NEW Seiler Image Capture Pro package provides the ability to capture live streaming video and digital images with an easy to use "one click capture" technology.
- The Seiler Image Capture Pro is the perfect compliment to the high quality CLARITY and the 3D capabilities of the Seiler Precision Microscope that you don't receive with similar video only technologies.
- Video only clarity can not compete with the clarity you can achieve through the use of the high quality optics of a Seiler Microscope, by adding the Seiler Image Capture Pro you will be getting the best of both worlds.
- The Seiler Image Capture Pro is also thousands of dollars less than similar products on the market, allowing you to allocate always needed dollars to other projects without having to sacrifice functionality.
