A \$995.00 VALUE. (SPACE IS LIMITED)

TECHNOLOGY OF MAGNIFICATION: SEEING IS BELIEVING

PRESENTED BY:

Dr. Alen C. Jakob is the practice owner of Midtown Root Canal- Endodontic Specialists, 501 5th Avenue, New York, NY. Dr. Jakob attended the Case School of Dental Medicine in Cleveland, Ohio, a world-renowned medical and dental facility. While there, he became intrigued by the history, complexities and art that is root canal therapy. Through his deep involvement, Dr. Jakob went on to become president of the Endodontic Club at Case Western and was awarded with the Student Achievement Award from the American Association of Endodontists. Dr. Jakob went on to be the first student to directly enroll at NYU-Lutherans Medical Center's 2-year residency program in endodontics. Dr. Jakob has been at the forefront of implementing the latest in endodontic armamentarium in his practice, including Seiler Microscopes and Cone beam technology. Dr. Jakob endorses the use of the Seiler Instrument's microscope for its superior balance, ergonomic design, quality optics and ultra bright LED illumination that help him achieve superior endodontic surgical and non-surgical results for his patients.

Dr. Jakob uses his Seiler scope in upwards of 95% of the time while performing surgical and non surgical endodontic procedures. The use of a microscope would certainly enhance a dentist's ability to provide higher quality restorative, endodontic, periodontal and prosthodontics care for patients, all the while enhancing the dentist's work experience.

COURSE TOPICS & OBJECTIVES:

- Introduce the practitioner to the dental operating microscope.
- Introduce the practitioner to the value of high magnification.
- Provide an objective insight to everyday pitfalls, limitations, benefits and paradigm shifts associated with routine use of a dental operating microscope in a general dentistry setting.
- Allow the practitioner to experience the value of high magnification for themselves.
- Introduce the practitioner to microscope positioning.
- Introduce the practitioner to utilizing the microscope with the endodontic treatments.

LOCATION:

Essential Dental Systems
89 Leuning St. 2nd Floor
South Hackensack, NJ 07606

DATE:

May 11th, 2018

TIME:
